Schematic View

How to Use

1. Fill the water tank and thoroughly soak the cotton filter.
2. Ensure the battery is fully charged. If the battery level is low, connect the device to a power source before use.
3. Press the power button; the top lid will automatically open, activating the humidifier.
4. To turn off the humidifier, close the top lid by flipping it down.

Timing Feature

1. The humidifier will automatically shut off after 6 hours when operating in continuous mist mode.
2. The humidifier will automatically shut off after 8 hours when operating in intermittent mist mode.

Charging Indicator Light

1. Solid red light indicates the device is charging.
2. Solid green light indicates the device is fully charged.

Restart Methods for Automatic Shutdown

After the humidifier shuts down automatically following the 8-6 hour timer, there are two ways to restart it via the USB connection:

- A. Flip the top cover down, then press the power button to pop the top lid back up. The humidifier will resume operation.
- B. With the top lid open, unplug and then replug the USB connection. The humidifier will start working again.

If the battery is low and the humidifier shuts down automatically, connect the USB power cable with the top lid open. The humidifier will resume operation.

Cotton Filter Maintenance

Cotton filters are consumable items and should be replaced every 2-1 months. Replacement frequency may vary depending on water quality and usage. Replace the cotton filter if you notice a significant decrease in mist output or if atomization stops completely.

Usage Precautions

1. Avoid touching the misting holes with hands or hard objects to prevent damage or blockage of the atomizing plate. Do not subject the product to mechanical impact.
2. Use the USB power cord safely; disconnect it before adding water or moving the humidifier. Keep the USB interface dry and secure.
3. Before first use, ensure the cotton stick is fully soaked before placing it into the cotton stick compartment. This prevents dry cotton contact with the atomizing plate, which can cause burnout and damage to the humidifier.
4. Do not operate the humidifier without water, as prolonged dry operation may damage internal components and the exterior.
 - a. During daily use, always ensure there is sufficient water in the tank to prevent dry operation and potential damage.
 - b. When adding water, avoid letting water enter the product through gaps such as buttons, mist outlets, or charging ports, to prevent circuit board short circuits that could cause damage or malfunctions.
5. Do not add essential oils directly without water. When adding water, limit essential oil to 2-1 drops of water-soluble oils only. Non-water-soluble oils can reduce the lifespan of the cotton filter or clog the mist outlet, causing the humidifier to malfunction.

6. It is recommended to use mineral water or tap water with fewer impurities. Avoid using distilled or pure water, as it may not produce mist effectively and can leave water droplets or impurities that reduce the cotton stick's lifespan and block the atomizing plate holes.
7. Do not tilt the product while it contains water. Uneven placement may cause internal electronic components to short circuit, resulting in product damage.
8. Keep the humidifier away from heat sources, open flames, and environments exceeding 50°C (122°F).
9. Children under 14 years old and elderly users should be supervised by adults during operation

Specifications

Model No.	GL-HU11
Material	ABS+PET
Battery	1100mAh
Power	3W
Water Tank	500 ml
Mist Output	60 mL/h
Charging Port	Type-C
Charging Time	2.5 Hrs
Working Time	4-8 Hrs
Product Weight	250 g
Product Dimensions	110*110*152 mm

Ensure the essential oil used is water-soluble; otherwise, it may clog the mist outlet and cause the humidifier to malfunction.

Always add water and securely close the humidifier before pressing the power button to turn on the Humidifier.

Troubleshooting

1. Ensure the cotton filter is fully soaked before use.
2. Re-soak the dry cotton filter if the humidifier has not been used for an extended period.
3. Replace the cotton filter every 2-1 months.
4. If the atomizer is blocked by essential oil, gently clean it with vinegar or alcohol. (No mist will be produced when essential oil usage blocks the atomizer.)
5. Check the charging cable and power supply to ensure they are functioning properly.
6. If the humidifier shuts down due to the timer, press the power button or reconnect the USB charging cable to restart it.
7. If the humidifier shuts down because of low battery, charge it promptly and press the power button to restart.

Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

Warranty

Products that you buy directly from our **Green Lion** website or shop come with a 24-month warranty.

When you buy **Green Lion** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **<https://www.greenlion.net/warranty>** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
