## Features

1. Equipped with two USB ports to charge multiple devices simultaneously, enhancing the utility and convenience of the power bank.
2. Features a modern Type-C input for fast recharging of the power bank itself, aligning with the latest standards for device compatibility.
3. The power bank boasts a sleek, slim design, making it highly portable and easy to carry in a pocket or bag.
4. Offers a substantial 10,000mAh battery capacity, providing ample power to recharge multiple devices multiple times.

## Overview

Thank you for purchasing a portable mobile power system. This device is compact, lightweight, and multifunctional, designed to facilitate charging your portable electronic devices—such as mobile phones, MP3/4 players, iPods, Bluetooth devices, gaming consoles, and camera models—whenever you travel or are away from a fixed power source. This manual describes how to use this product and addresses important safety issues. Please read and retain this manual for future reference.

## Safety Precautions

1. If the power bank is being used for the first time or after long-term storage, it may be automatically discharged and should be fully charged before use. Please note that it normally requires two or three complete charge and discharge cycles to achieve optimal performance initially.
2. Always use the specified charger and approved accessories, including the adapter, charging cable, and transmission cable.
3. Using unauthorized power chargers and accessories may cause damage to your portable electronic devices and mobile phones.
4. Ensure the device is charged in a well-ventilated area where the temperature is neither too high nor too low, as extreme temperatures can adversely affect battery performance.
5. Do not place this product in water or expose it to heavy rain.

6. Avoid dropping, striking, or shaking the device harshly as these actions can damage the internal components and compromise the product's structural integrity.
7. Keep this product and all related accessories out of the reach of children to prevent accidents and ensure safety.
8. It is normal for the mobile power host to become slightly warm during charging.
9. Do not place the power host near fire or other heat sources to prevent hazards.
10. Avoid allowing metal objects to come into contact with the charging and discharging ports of the mobile power host as this can cause a short circuit and damage the device.
11. Any unauthorized modification or repair of this product may cause malfunctions, harm, and injury to users.
12. Ensure the use of mobile power devices adheres to local laws, bylaws, and limitations to guarantee safe and appropriate operation. Should the mobile power host operate without authorization, it is crucial to immediately turn off your cell phone or other electronic devices to prevent any interference.

## Product Function

**Power Input:** Micro USB for charging the mobile power unit.

**Power Output Interface:** Type A USB interface for output to other devices.

## Specifications

Battery Capacity	10000mAh
Type-C Input	5V/2A 10W
Micro-USB Input	5V/2A 10W
USB-A 1and 2 Output	5V/2A

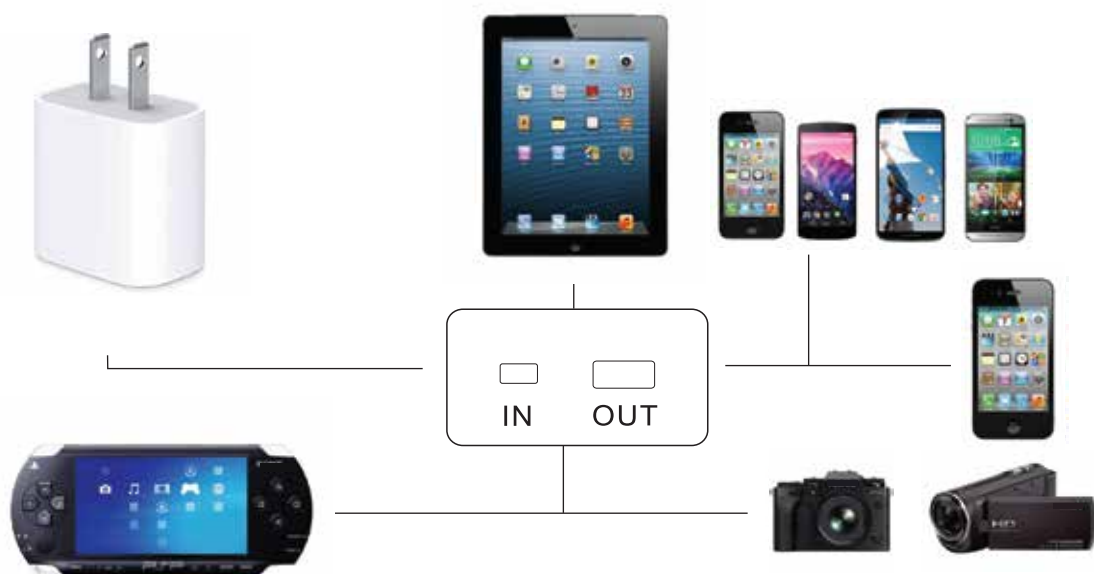

## Charging the Power Bank

If it is the first use, or after long-term storage, it is recommended to activate the mobile power charging cycle three times before regular use. The initial charging process should last approximately 20 hours. Subsequent charges will typically require only 8 hours to achieve full capacity. Optimal performance is indicated by the steady illumination of blue indicator lights during charging. The USB-DC output, along with a Micro USB adapter, can be used to charge the mobile power unit via any available power adapter or through USB charging from a computer. The blue indicator lights up to show the power status of the mobile power unit.

## Charging Other Devices

The mobile power supply is designed for charging digital products with a DC-5V input, making it compatible with most mobile phones and digital communication devices. When connected to an external device, the red indicator light will illuminate to indicate power usage; this light turns off when the device stops drawing power.

**Note:** When you stop charging, the power bank stops supplying power to the external device.

## **Warranty**

Products that you buy directly from our **Porodo** website or shop come with a 24-month warranty.

When you buy **Porodo** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **porodo.net/warranty** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
